

STUDENTS WELCOMED to NCI WILLOUGHBY

In August of 2016, students had the opportunity to begin the year in the newest building in the district. In the Spring of 2016, Willoughby-Eastlake took possession of the property located at 34343 Euclid Avenue. The building formerly housed Northcoast Lincoln Mercury and has been renovated to accommodate several of the Willoughby-Eastlake career technical programs.

The acquisition of the new property allowed students to move from antiquated classroom environments to state-of-the-art spaces. In addition to providing improved learning environments, the district was able to retire three buildings in need of approximately \$33 million in repairs at a cost of \$5.5 million. The savings to the community was nearly \$17.5 million.

Accompanying the change in locations, Willoughby-Eastlake joined the Excel TECC consortium, offering career technical students the ability to choose from twenty seven course offerings. The programs offered in the Willoughby location are Auto Collision, Auto Services, Business Academy, Cosmetology, Welding and Travel, Tourism and Lodging Management.
